## PHYSICS LETTERS A

A journal devoted to the rapid publication of letters in the fields of *General Physics, Atomic Physics, Molecular Physics, and Solid State Physics*

Editors: D. Bloch, *Grenoble*; J.I. Budnick, *Storrs*; D. ter Haar, *Oxford*; A.A. Maradudin, *Irvine*; M.R.C. McDowell, *London*; R. Wienecke, *Stuttgart*.

## INSTRUCTIONS TO CONTRIBUTORS TO PHYSICS LETTERS A

**Submission:** Contributions, written in English, French or German, should be sent to:

Physics Letters, North-Holland Publishing Company, P.O. Box 103, 1000 AC Amsterdam, The Netherlands.

Authors in the Americas of papers on condensed matter physics may also send their manuscripts directly to:

J.I. Budnick, Department of Physics, University of Connecticut, Storrs, CT 06268, USA,

for papers in experimental condensed matter physics, or to:

A.A. Maradudin, Department of Physics, University of California, Irvine, CA 92717, USA,

for papers in theoretical condensed matter physics.

The manuscripts should be submitted in duplicate, one copy of which is the typewritten original. Authors are requested to indicate on the manuscript the appropriate category of their paper following the ICSU classification scheme (see end of each volume).

**Manuscripts** should be typed on one side of the paper, with double spacing and a wide margin. The title page should contain title, author(s), address(es) and abstract. The main text should start on a new page.

The length of the letters should not normally be more than three pages in print. An *abstract* of less than 50 words is required.

The drawings for the figures must be submitted on separate sheets, drawn in black India ink and carefully lettered (with the use of a stencil), in such a way that they can be reduced to a one-column width. Sharp and contrasty glossy prints are also acceptable. If requested, original drawings will be returned to the author(s) upon publication of the paper.

**Corrections and modifications.** Once the paper has been accepted for publication, minor corrections should be sent directly to the publisher (see below). Extensive modifications should be sent to the editor, while the publisher should be notified to hold publication. Authors may be charged with the costs of necessary typesetting.

After acceptance of the paper for publication, all further correspondence (except extensive modifications, see above) should be sent to the publisher, and not to the editors (Drs. S.A.M. Pepping, Editorial Department, North-Holland Publishing Company, P.O. Box 103, 1000 AC Amsterdam, The Netherlands; telephone number (020) 762013).

More elaborate instructions to authors can be found at the end of each volume.

## SUBSCRIPTIONS

Sections A and B of PHYSICS LETTERS will each be published weekly. The subscription price of a volume of Physics Letters A is Dfl. 160.00 (approx. \$ 82.00) plus Dfl. 18.00 (approx. \$ 9.00) handling and mailing costs. For 1981 6 volumes Physics Letters A at a total subscription price of Dfl. 1068.00 (approx. \$ 548.00) including handling and mailing costs, and 9 volumes Physics Letters B at a total subscription price of Dfl. 1602.00 (approx. \$ 822.00) including handling and mailing costs, are announced.

PHYSICS REPORTS will be published approximately weekly. The subscription price of a volume of Physics Reports is Dfl. 160.00 (approx. \$ 82.00) plus Dfl. 18.00 (approx. \$ 9.00) handling and mailing costs. For 1981 12 volumes Physics Reports are announced at a total subscription price of Dfl. 2136.00 (approx. \$ 1095.00) including handling and mailing costs.

The combined subscription price for 15 volumes Physics Letters and 12 volumes Physics Reports is Dfl. 4286.00 (approx. \$ 2198.00) including handling and mailing costs.

Subscriptions may be sent to your subscription agent, bookseller or to the Publisher: NORTH-HOLLAND PUBLISHING COMPANY, Journal division, P.O. Box 211, 1000 AE AMSTERDAM, THE NETHERLANDS.

**Claims for missing numbers** should be made within two months following the date of publication. The Publisher expects to supply missing numbers free only when losses have been sustained in transit and when stock will permit.

Submission of an article for publication implies the transfer of the copyright from the author(s) to the publisher and entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

**Special regulations for readers in the USA.** This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US \$ 2.50, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

**Special regulations for authors in the USA.** Upon acceptance of an article by the journal, the author(s) will be asked to transfer the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information under the US Copyright Law.

# Electronic and Atomic Collisions

## Invited Papers

Proceedings of the 11th International Conference on the Physics of Electronic and Atomic Collisions (ICPEAC XI), Kyoto, Japan, August 29 - September 4, 1979.

*edited by* N. ODA, *Nuclear Reactor Research Laboratory, Tokyo Institute of Technology*, and K. TAKAYANAGI, *Institute of Space and Aeronautical Science, University of Tokyo, Japan*.

1980. xiv 844 pages

Price: US \$109.75/Dfl. 225.00

ISBN 0-444-85434-7

The Kyoto Conference is one of a series of conferences, the first of which was held in New York in 1958. They are now held every two years.

In this volume, the texts of all the oral presentations at the Conference: 10 invited lectures and review talks, 17 progress reports and papers presented at 8 symposia, are included. The papers, listed below, deal with two-body interactions between ions, atoms, simple molecules, electrons (and positrons) and photons. The collision energies of interest range from subthermal to millions of electron volts.

This book and the Book of Abstracts of Contributed Papers together form the official scientific record of the Kyoto ICPEAC.

**CONTENTS: Invited Lectures and Review Talks.** Papers by: H. C. Bryant, M. Inokuti, Y. Kaneko, J. Kistemaker, P. Richard, A. L. Schawlow, I. I. Sobel'man, A. Temkin, E. Weigold, F. J. Willeumier, **Progress Reports.** Contributors: N. Andersen, S. Andriamonje, P. Armbruster, Y. Awaya, H.-H. Behncke, F. Bosch, J. F. Chemin, R. N. Compton, J. L. Dehmer, D. Dill, J. S. Greenberg, W. Greiner, P.-M. Guyon, S. Hagmann, H. Hotop, W. R. Johnson, S. Joly, D. Liesen, J. W. McConkey, J. Wm. McGowan, P. H. Mokler, B. Muller, R. H. Neynaber, V. D. Ob'edkov, J. Reinhardt, J. Roturier, H. Schmidt-Bocking, R. Schuch, G. Soff, H. S. Taylor, J. P. Thibau, J. Uzureau, M. J. van der Wiel. **Symposia: ELECTRON CAPTURE BY MULTIPLY-CHARGED IONS.** Contributors: D. H. Cran-

dall, F. J. de Heer, R. McCarroll, A. Muller, R. E. Olson, M. N. Panov, H. Ryufuku, E. Salzbom, P. Valiron, T. Watanabe. **RYDBERG STATES OF ATOMS AND MOLECULES.** Contributors: J.-F. Delpech, T. F. Gallagher, M. Matsuzawa, R. D. Rundel, R. F. Stebbings. **STATE-RESOLVED ATOM (ION)—MOLECULE RO-VIBRATIONALLY INELASTIC AND REACTIVE SCATTERING.** Contributors: J. Andres, K. Bergmann, U. Buck, P. J. Dagdigan, U. Hefter, F. Huisken, I. Koyano, F. Linder, J. Schleusener, K. Tanaka, J. P. Toennies, F. Torello, J. Witt. **AMPLITUDES AND STATE PARAMETERS IN ATOMIC COLLISIONS.** Contributors: N. Andersen, T. Andersen, K. Blum, J. S. Dahler, R. Hippler, E. Horsdal Pedersen, V. Kempter, H. Kleinpoppen, H. O. Lutz, B. Menner, R. Morgenstern, S. E. Nielsen, J. Østgaard Olsen, J. Pfaff, B. Staudenmayer, J. F. Williams, L. Zehnle. **ELECTRON DETACHMENT IN NEGATIVE ION COLLISIONS.** Contributors: R. L. Champion, Yu. N. Demkov, V. Esaulov, J. P. Gauyacq, A. Herzenberg, J. S. Risley. **ATOMIC AND MOLECULAR COLLISION PROCESSES UNDER THE INFLUENCE OF STRONG RADIATION FIELDS.** Contributors: D. Andrick, C. Brechignac, Ph. Cahuzac, P. L. De Vries, T. F. George, I. V. Hertel, K. S. Lam, W. H. Miller, A. E. Orel, P. E. Toschek, J. Weiner. **NEW THEORETICAL METHODS.** Contributors: R. J. Damburg, V. V. Kolosov, Vo Ky Lan, M. Le Dorneuf, J. Macek. **NEW EXPERIMENTAL TECHNIQUES.** Contributors: T. Arikawa, B. Bederson, N. R. Gentry, K. K. Jung, S. R. Leone, J. Los, W. H. Pence, R. W. Wijngaendts van Resandt. **Author Index.**

## ICPEAC XI

**11th International Conference on the Physics of Electronic and Atomic Collisions, August 29 - September 4, 1979, Kyoto, Japan.**

### Abstracts of All Papers

*edited by* N. ODA, and K. TAKAYANAGI.

1979. 1080 pages.

Price: US \$122.00/Dfl. 250.00

ISBN 0-444-85393-6

This volume contains the abstracts of all the papers presented at the 11th ICPEAC Conference. The papers cover various aspects of electronic and atomic collisions. The extraordinary diversity of topics discussed can best be seen from the extensive section headings.

STUDIES IN STATISTICAL MECHANICS, IX

# Perspectives in Statistical Physics

edited by H. J. RAVECHÉ, *National Bureau of Standards, United States Department of Commerce, Washington, DC 20234, U.S.A.*

1981 xxviii + 368 pages Price: US \$73.25/Dfl. 150.00 ISBN 0-444-86026-6

This volume contains eighteen chapters covering a broad spectrum of topics in the fields of nonequilibrium processes, phase transitions, dynamical systems, interfaces and quantum phenomena. Each chapter contains original work or gives a critical assessment of earlier work for the purpose of revealing future directions. The contributions were received from colleagues of Melville S. Green as a memorial to his extraordinary research in statistical physics. The chapters follow the example set by M. S. Green for exposing profound issues. Research workers and graduate students will find that the volume provides stimulating perspectives for further research.

**CONTENTS:** Dedication to M. S. Green (*H. J. Raveché*). Remarks on M. S. Green (1) (*E. G. D. Cohen*). Remarks on M. S. Green (2) (*Michael E. Fisher*). M. S. Green's Curriculum Vitae. M. S. Green's Publications. **Part I. Non-Equilibrium Processes.** Chapters: 1. The Lorentz Gas (*B. J. Alder and W. E. Alley*). 2. Some Recent Developments in the Kinetic Theory of Gases (*J. R. Dorfman*). 3. Non-Equilibrium Fluctuations and the Hierarchy (*M. H. Ernst and E. G. D. Cohen*). 4. Green's Contributions to Non-Equilibrium Statistical Mechanics Revisited (*L. S. Garcia-Colin and J. L. Del Rio*). 5. Stochastic Description of Many-Body Systems (*N. G. van Kampen*). 6. H-Theorems for Markoffian Processes (*R. Kubo*). 7. Energy Flow and Thermal Conductivity in One-Dimensional Harmonic, Isotopically Disordered Crystals (*R. J. Rubin*). 8. Where Do We Go From Here? (*R. Zwanzig*). **Part II. Phase Transitions.** Chapters: 9. A New Model Hamiltonian for a Correlated Electron System Within the General Framework of Critical Phenomena and Phase Transitions (*C. di Castro*). 10. Membrane Flux: Conditions for Limit Cycle Oscillations (*A. G. De Rocco and G. L. Clark*). 11. Critical Phenomena - A Model Illustration of Scientific Method (*C. Domb*). 12. Coarse-Grained Helmholtz Free Energy Functional (*K. Kawasaki et al.*). 13. Exact Renormalization in Two Dimensional Ising Systems (*J. M. J. van Leeuwen*). 14. How Close is "Close to the Critical Point"? (*J. M. H. Levelt Sengers and J. V. Sengers*). 15. The Interface Between Fluid

Phases (*B. Widom*). **Part III. Foundations.** Chapters: 16. On Higher Order WKB Approximations for the Calculation of Energy Levels (*F. T. Hioe et al.*). 17. Equilibrium Density Matrix for Fluids (*J. E. Mayer*). 18. The Mechanisms of Stochasticity in Classical Dynamical Systems (*A. S. Wightman*). Subject Index.

# Theory of Metal Oxidation

## Volume II: Space Charge

by A. T. FROMHOLD, JR., Auburn University, Alabama, U.S.A.

1980. xx + 324 pages. Price: US \$61.00/Dfl. 125.00. ISBN 0-444-85381-2

This volume focuses on the domain of thicker oxide film growth on metals, thus complementing volume I, which was concerned primarily with the domain of thin oxide film growth. Space charge effects, which are extremely important for the kinetics of growth of thicker oxides, are fully taken into account. An introduction to the role of space charge is given by means of perturbation and averaging techniques, and this is followed by exact treatments employing numerical computations. Electron transport by both thermal emission and diffusion in accordance with the hopping model are considered. Electron transport and ion transport through the oxide are coupled through the built-in electric field. In the case where both ions and electrons are transported by diffusion, the understanding achieved by the numerical computations is used to develop meaningful approximations which lead to the prediction of a thick-film parabolic growth law. The rate constants and built-in voltages are evaluated in terms of the bulk defect concentrations of the diffusing species at the interfaces and the mobilities of those species. An extension to cases involving three diffusing species is made. The author thus presents in detail, for the first time, a complete microscopic theory of parabolic oxide film growth in the thick film limit, thereby providing a sound physical basis for the most widely observed experimental metal oxidation kinetics.

This book is recommended for all students and researchers who wish to obtain a deep understanding of the growth of thick oxide films on metals.

**CONTENTS:** Chapters: 13. Analytical Approximation Techniques for Evaluating Diffusion-Controlled Oxidation Kinetics and the Corresponding Defect Profiles in Perturbing Space-Charge Fields.

14. Space-Charge Modifications in the Model Based on Thermal Electron Emission and Ionic Diffusion. 15. Oxidation Kinetics in the Large Space Charge Diffusion-Controlled Limit Leading to the Thick-Film Parabolic Growth Law. 16. The Virtual Current Equilibrium Approximation for Two Diffusing Species in the Large-Space-Charge Limit. 17. Three Diffusing Species in the Thick-Film Virtual-Current-Equilibrium Limit. *Appendix H:* Airy Function Identities Utilized in Numerical Computations. *Appendix I:* Classical Screening. *Appendix J:* Equilibrium Mass Action Products.

### Volume I: Fundamentals

1976. xxiv + 548 pages  
Price: US \$80.50/Dfl. 165.00  
ISBN 0-7204-1759-7

In the "*Theory of Metal Oxidation*", Professor Fromhold has formulated a new approach to the integration of coupled transport equations which will be of considerable value to theoretical and experimental scientists in the field. With the advent of modern, high-speed digital computers, this new method is also likely to become a cornerstone for the evaluation of oxidation kinetics models.

*"... The mathematical aspects of coupled circuit theory are treated with the very greatest thoroughness."*

**Physics Bulletin**

*"It presents a very thorough introduction of the field... Much emphasis has been placed on basic theory and the book will therefore be of lasting value. The purchase of the book can be highly recommended, as it achieves its aim of presenting a comprehensive treatise on the subject."*

# SOLID STATE IONICS

An interdisciplinary journal devoted to experimental and theoretical research involving properties related to ionic transport phenomena in solids.

## Editors:

### Principal Editor:

**M. Stanley Whittingham**

Corporate Research, Exxon Research and Engineering Company, P.O. Box 45, Linden, N.J. 07036 U.S.A.

### Coordinating Editor - Europe:

**Brian C. H. Steele**, Imperial College, London, U.K.

## Editors:

**Robert A. Huggins**, Stanford University, CA, U.S.A.

**K. Funke**, Technical University, Hanover, Germany

**Michel Kleitz**, ENSEEG, France.

**Priya Vashishta**, Argonne National Laboratory, IL, U.S.A.

**H. Rickert**, Universität Dortmund, Germany

## Associate Editorial Board:

D. A. J. Rand (*Australia*); R. R. Haering (*Canada*); Li-Chuan Chen (*China*); M. B. Armand, R. Comes, P. Hagenmuller and J. Rouxel (*France*); A. Rabenau and R. Schöllhorn (*F. R. G.*); B. Scrosati (*Italy*); T. Takahashi, N. Watanabe (*Japan*); J. Schoonman (*The Netherlands*); S. M. Mrowec (*Poland*); A. Lunden (*Sweden*); H. Beyeler (*Switzerland*); R. D. Armstrong, J. B. Goodenough, B. C. Tofield (*U.K.*); J. B. Bates, G. C. Farrington, G. G. Libowitz, G. D. Mahan, J. N. Mundy, D. W. Murphy, B. B. Owens, W. L. Roth, A. H. Thompson and D. H. Whitmore (*U.S.A.*).

## Scope:

This interdisciplinary journal is devoted to the physics, chemistry and materials science of ion transport phenomena in solids, and properties resulting from ion mobility. It is anticipated that papers on topics such as the following will constitute the major part of each issue: physics and chemistry of defects; ionic transport measurements and mechanisms; theories of ion transport; incorporation of ions into electronic conductors; many aspects of solid state electro-chemistry/physics including interfacial properties; processes such as corrosion oxidation, sintering and other solid state reactions. Related technological applications such as batteries, fuel cells, electrochromic displays, solid state chemical sensors, hydrogen storage materials, catalysis,

photography, electrolysis cells, metal winning, etc., will also be included, provided that the performance characteristics are interpreted in terms of the relevant ionic transport processes. Review papers and relevant symposium proceedings are welcome.

## Recent Papers Published:

Polarizability of Ions in Crystals (G. D. Mahan). Lithium Incorporation in Tungsten Oxides (K. H. Cheng and M. S. Whittingham). Defect Structure and Diffusion in Nonstoichiometric Ferrous Sulphide (M. Danielewski, S. Mrowec and A. Stoklosa). Electrointercalation and Diffusion of Silver in Tantalum Disulphide (F. Bonino, M. Lazzari, C. A. Vincent and A. R. Wandless). Carbon Monoxide Gas Sensor Made of Stabilized Zirconia (H. Okamoto, H. Obayashi and T. Kudo). Preparation and Mass Transport Properties of  $\text{Li}_{2.3}\text{Mo}_6\text{S}_{7.7}$  (K. Y. Cheung and B. C. H. Steele). Structural Studies of the High-Temperature Modifications of Sodium and Silver Orthophosphates,  $\text{II-Na}_3\text{PO}_4$  and  $\text{II-Ag}_3\text{PO}_4$ , and of the Low-Temperature Form  $\text{I-Ag}_3\text{PO}_4$  (J. M. Newsam, A. K. Cheetham and B. C. Tofield). The Role of Disorder in Superionic Conductors (M. Villa and J. L. Bjorkstam).

## Submission of Manuscripts:

Contributions should be sent in triplicate to one of the editors or preferably to one of the associate editors (not in the authors own institution) who is familiar with the research reported. The journal offers two modes of publication: **Rapid publication**. Papers may be submitted in camera-ready form. They may be in English, French or German, but should all have an English abstract. **Conventional publication**. In this case, papers should be in English and will be typeset in the normal way. The authors will receive proofs. A detailed "Instructions to Authors" is available upon request from the Publisher.

## Forthcoming Special Issues:

Solid State Ionics and Galvanic Cells, Third International Meeting, Tokyo, Japan, 15-19 September, 1980 edited by K. FUEKI, B. B. OWENS and T. TAKAHASHI

Fast Ion Transport, Conference on Solid Electrolytes, Gatlinburg, Tennessee, U.S.A. 18-22 May, 1981 edited by J. B. BATES and G. C. FARRINGTON

## Subscription Information:

1981: Vols. 2-5 in 12 issues

**Subscription Price for 1981:** US \$324.25/Dfl. 632.00 including postage and handling.

**Free specimen copies are available from the publisher.**
